

Garmin Cyclops Safety Cameras – South Africa

Garmin Southern Africa (Pty) Ltd is pleased to announce the availability of the Garmin Cyclops Safety Cameras product for South Africa. As the number and locations of safety cameras in South Africa are ever-changing, ensure you drive aware, alert and assured with updates to the powerful safety camera database inside your device. The Garmin Cyclops Safety Camera updates for your device are available through a yearly subscription, a One-time purchase or a Free Trial.

Free Trial Available

Help avoid fixed and mobile safety cameras by keeping your safety camera information up-to-date. Camera location updates are posted regularly. Subscribe and get updates from the safety camera database at *myGarmin* (www.mygarmin.com).

Alerts

As you approach a camera, your device sounds an alert (certain models display a speed limit warning). The Cyclops Driver Safety System is powered by smart GPS software, which recognises the road and direction of travel to provide route-relevant alerts without false warnings.

Safety camera updates link your device to the Cyclops database, which is regularly maintained and contains verified information about fixed, average speed, mobile, variable, temporary/roadwork, red light and red light speed cameras. As new enforcement technologies are deployed by road authorities Cyclops will add these to the database.

Update Options*

Travel safely and legally while avoiding fines or penalty points. Garmin Cyclops Safety Camera information is available in various formats including a *One-Year Subscription*, a *One-Time Download*, and a *Free Trial*. Format selection will depend on how frequently you plan to download updates as well as the length of time you would like to have the service.

Free Trial

Not sure if you are interested in a safety camera subscription? A 30-day free trial allows you to test out the service free of charge. Updates can be downloaded to your device throughout the free trial period. One free trial is offered per device and at the end of the trial, a new One-time update or One-year subscription can be purchased.

One-Time Download¹

This update option will allow for a one time update purchase of the Cyclops safety cameras database. This inexpensive purchase option will give you up to date information at your time of purchase, and as information becomes outdated, another One-time update or a one year subscription may be purchased.

¹ *One-Time Download is only available as an online purchase and download*

One-Year Subscription

A One-year subscription will provide unlimited safety camera downloads over the course of one year. Pay only one time and return as often as you choose to download updates to your compatible device. This option will keep your device up to date as safety cameras are relocated or added.

There are two options available for the One-year subscription:

1. Simply go to the *myGarmin* account your device is registered under to purchase and activate the One-year subscription.
2. Purchase a Retail Card from a Garmin authorised dealer (R 199.00 Incl. VAT RRP), then simply activate the One-year subscription from the *myGarmin* account using the retail card, no online purchase required.

*An internet connection and USB cable is required. Subscription may only be used for one (1) region and can only be used with one (1) compatible device. Online transactions will be charged for and is payable in American Dollars (US\$). Please be aware that your financial institution may charge you a higher transaction fee and/or levy additional charges for this foreign currency payment, for which Garmin does not take any liability.

Compatibility

Garmin Safety Cameras has been optimised for devices pre-loaded with City Navigator maps. These devices are supplied with a data file of the Cyclops safety cameras database. As this file is updated regularly, by the time an end user starts using a device the file may be outdated. To avoid using outdated Cyclops data, an end user can simply go online and use the Free Trail option and will have access to regular updates for the Cyclops safety cameras for 30-days, thereafter either a One-time or One-year subscription purchase will be required.

Devices preloaded with City Navigator South Africa and Cyclops safety camera data file includes: nüvi 30, 40, 50, 2200, 2300, 2360LT, 2460LT, 2495LT, 2595LT, 3490LT, 3590LT, 3760LT, 3790LT & nüLink! 2390

The following devices are also compatible, but functionality is device dependant:

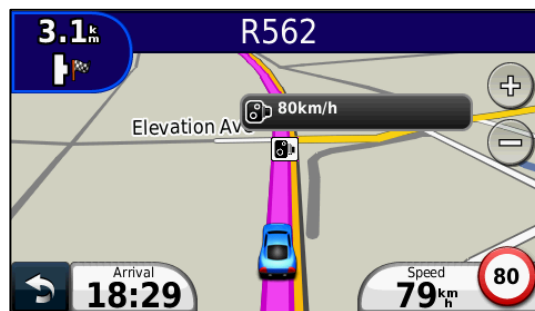

Legacy nüvi devices: 200, 200W, 205, 205W, 215, 215W, 300, 310, 350, 360, 370, 500, 610, 660, 670, 710, 715, 760, 860, 1200, 1300, 1310, 1410

zūmo series devices: 220, 350, 450, 550, 660

If you are uncertain of compatibility, we recommend trying the 30 Day FREE trial of Garmin Safety Cameras before purchasing. The 30 Day FREE trial is available as an online download only, and can be downloaded from <http://www.garmin.com/us/extras/services/safetycamera>.
