

Garmin Safety Cameras - Retail Card

1-year subscription for safe and aware driving!

Garmin Southern Africa (Pty) Ltd is pleased to announce the availability of the Garmin Safety Cameras Retail Card. Customers can now purchase this convenient retail card from stores and activate* the one-year subscription on the Garmin website (www.garmin.com/activatecard). With this one-year subscription customers can update their device with verified safety camera data as many times as they wish during the year. These updates link the Garmin device to the Cyclops database, which contains regular-updates to verified information about fixed, average speed, mobile, variable, temporary/roadwork, red light and red light speed cameras. The Garmin Safety Cameras Retail Card is compatible with most nüvi and zūmo series devices. For device compatibility see the compatible devices section below, or try the 30 day trial before purchasing the retail card.

Note: Subscription may only be used for one (1) region** (selected upon activation) and can only be used with one (1) compatible device. For additional subscriptions or for use on additional devices, please purchase additional subscriptions.

* An internet connection and USB cable is required

** Available regions include: **South Africa**, Austria and Germany, Belgium and Luxembourg, Eastern Europe, Italy and Slovakia, Netherlands, Russia, Spain and Portugal (Each region requires the purchase of a separate subscription)

Features:

- Provides verified alerts for fixed, average speed, mobile, variable, temporary/roadwork, red light and red light speed cameras.
- Displays speed limit warnings and sounds alerts on compatible devices using a corridor system powered by Cyclops technology.
- Ensures accuracy with each camera and zone being individually verified and mapped to confirm average speed, camera type, direction and distance covered.
- Contains content from official agencies and verified user feedback.
